

France Elevateur's TBE range offers class leading specifications from compact dimensions. The maximum working height of 28.20m and an amazing 23m of outreach with 300kg basket capacity this new range offers the best working area in its class.

- Heavy-duty four (4) stage telescopic boom gives users a stable ride.
- Two stage telescopic jib offers longest jib in its class and provides more flexibility.
- All hydraulic and electric circuits are protected inside the boom sections reducing the risk of damage.
- 4x4 chassis allow easy access to even the most hard to reach places with ease. Telecommunication towers, power lines & trees are often located in remote areas.
- Narrow jacking within the width of the vehicle makes setting up in congested areas a breeze.
- Fibreglass basket 2 x 90° rotation.
- Proportional electro-hydraulic controls provide precise fluid control.
